What the Problem Is

Data Overload

Massive daily sales data generation.

Analysis Paralysis

Raw rows block quick decisions.

Blind Spots

Missing clear visual profit summaries.

What Do You Observe (The Data)

The Source

Kaggle 'Superstore Sales' dataset.

The Structure

Granular columns: Region, Category, Sales.

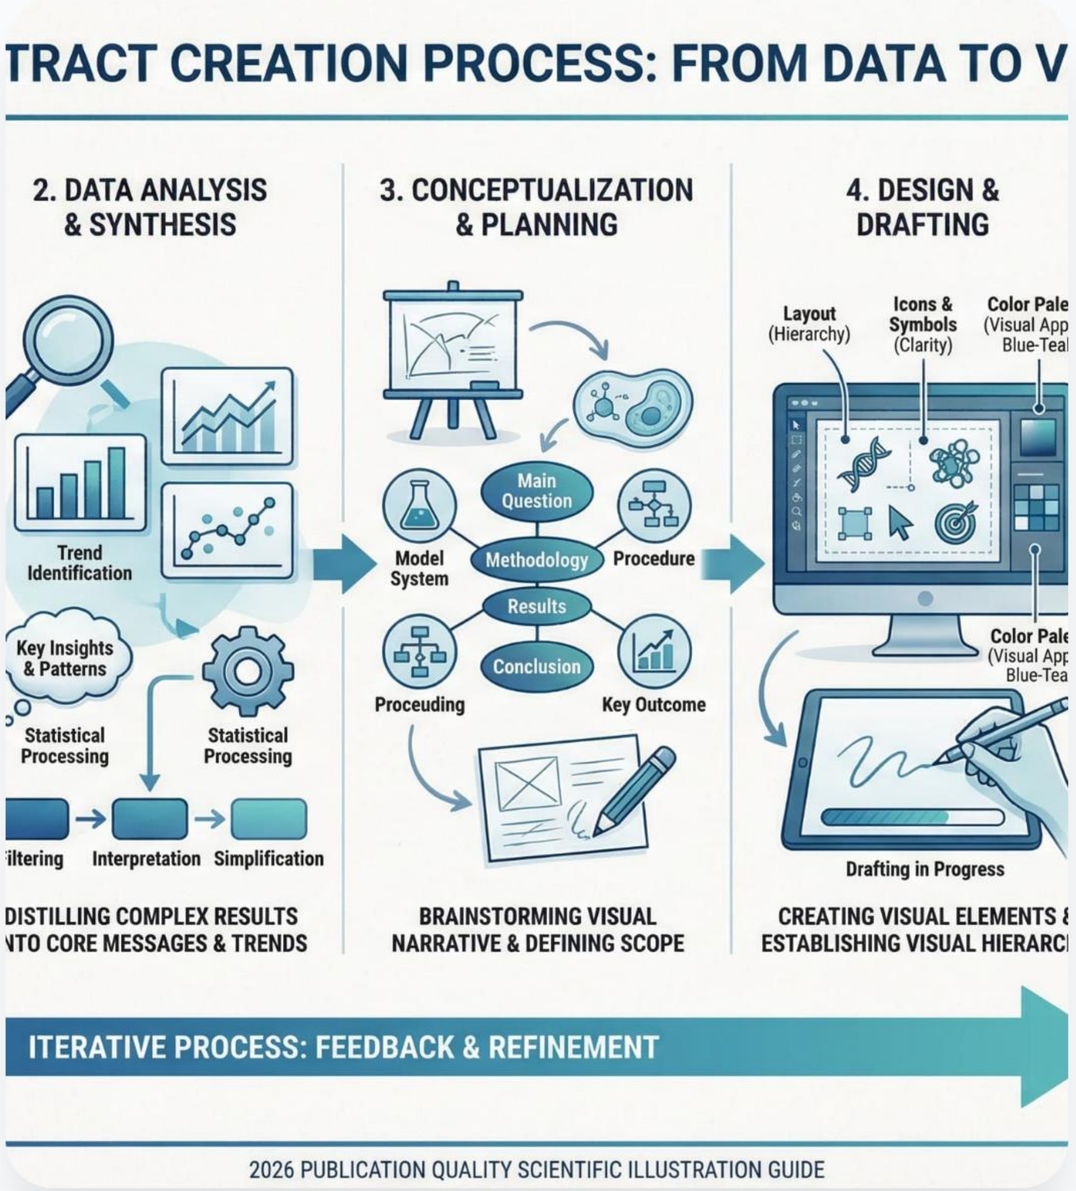

The Challenge

Manual scrolling obscures performance trends.

THE SOLUTION

What You Made to Solve the Problem

- **Dynamic Dashboard**
  Interactive MS Excel interface built from scratch.
- **Instant Clarity**
  Raw data transformed into one-glance visual charts.
- **Unified Monitoring**
  Single screen tracking multiple business areas.

How It Works: Data Preparation

The foundation of an accurate dashboard.

1

Clean

Verified accuracy, removed blanks and duplicates.

2

Summarize

Condensed large data via PivotTables.

3

Segment

Separated by Category, Region, and Segment.

How It Works: Creating the Charts

Converted PivotTables into visual PivotCharts.

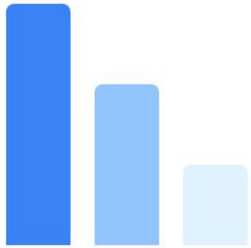

Sales by Category

Pie Chart

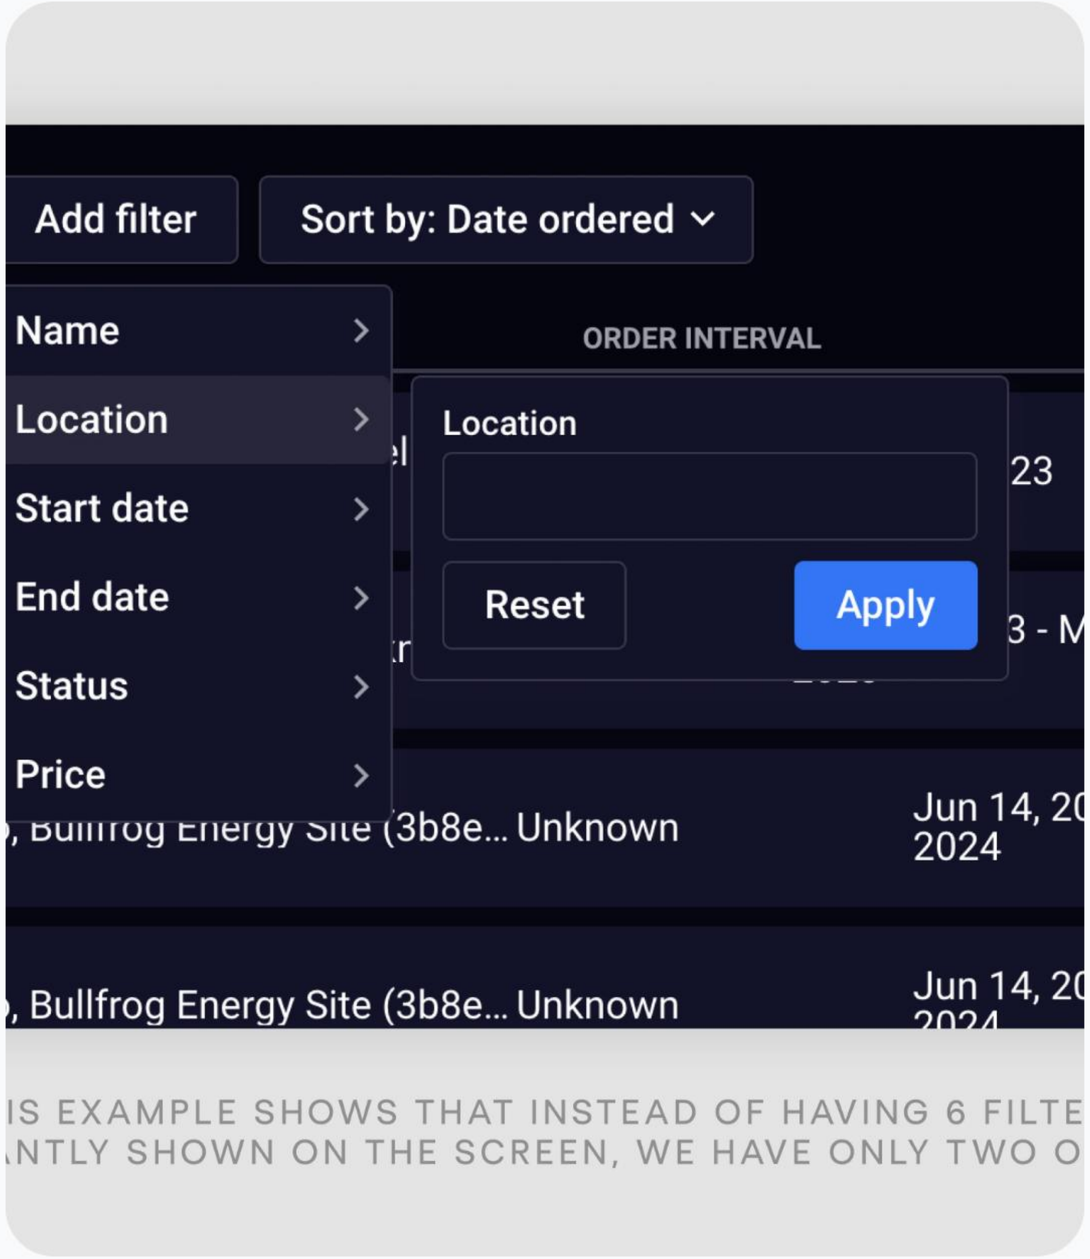

Sales by Region

Pie Chart

Customer Segment

Bar Chart

THE INTERACTIVITY

Adding Slicers

1. Clickable Controls

Added 'Region' and 'Segment' Slicer buttons.

2. Report Connections

Linked Slicers to all three visual charts.

3. Instant Synchronization

Clicking one button updates all charts simultaneously.

Observation and Findings from the Data

Top Region

The "West" region generates the highest total sales.

Main Customers

"Consumer" segment outpaces Corporate and Home Office.

Product Demand

Balanced sales across Furniture, Tech, and Office Supplies.

Helpful Insights During the Making

The Linkage Problem

Creating new PivotTables repeatedly from the same data source breaks Slicer connections.

The Copy-Paste Solution

Copy-paste the base PivotTable and modify columns.

Result: Unified single-click control.

Conclusion

Organize to Optimize

Raw data demands structured visualization to be useful.

Powerful Core Tools

Excel PivotCharts and Slicers enable professional-grade dashboards.

Data-Driven Action

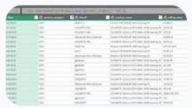

Empowers business owners to make fast, informed decisions.
